

# PLYON LITE BELT

The Pylon-Lite is a hip belt system that allows distribution of equipment between the torso and waist region while having the option to include ballistic protection. Contoured to cup the hips, and equipped with removable foam padding and a DWR high abrasion resistant liner, the belt can accommodate MOLLE style attachment pouches, 2" plastic clip mounted pouches, as well as having openings designed to be used in conjunction with a rigger, instructor, or gun belt. Harnesses and drop leg equipment can also be routed through openings. The Optional Pylon-Lite Spine also provides weight distribution to support the weight of the carrier off of the shoulders and transfer to the hips, while minimally affecting range of motion.

Can be ordered in three ways:

- Ballistic Belt + Nylon Belt + Spine
- Ballistic Belt + Nylon Belt
- Ballistic Belt only
