

SOB™ Checkpoint

Relocatable .50 CAL Defense System

The SOB™ Checkpoint Defense System offers protection from the most aggressive ammunition while maintaining as much mobility as possible. The SOB™ Checkpoint is rated to stop the .50 CAL armor piercing round. When the situation requires this level of ballistic defense the SOB™ Checkpoint is a versatile, adaptable solution.

No matter how you look at it, armor capable of stopping the .50 CAL AP round is heavy; yet our proprietary ballistic material minimizes overall weight while still allowing for mobility and portability. The SOB™ Checkpoint comes standard with forklift access points and can be readily moved and transported to create instant fortifications. The Checkpoint can also be fitted with casters and a toe apron allowing it to be maneuvered upon smoother surfaces and within indoor facilities. It can also be mounted on a trailer to provide a truly mobile checkpoint solution.

Common applications include security checkpoint protection, industrial security applications, power plant security, and mobile command center fortification.

Features

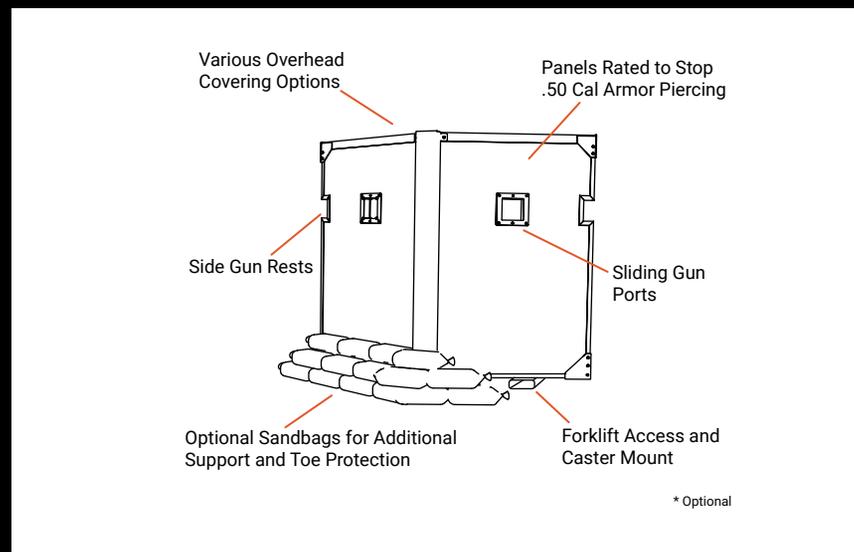

- Head-to-toe ballistic coverage
- Defeats up to .50 CAL armor piercing ammunition
- Several options available including Picatinny™ rails and lighting/video
- Forklift access points or caster configurations for mobility
- Situational gun ports and gun rests in multiple configurations

Ballistic Options

- N.I.J. Level IIIA (9mm FMJ 124 gr., .44 MAG SWCGC 240 gr.)
- N.I.J. Level III (7.62mm Ball M80 149 gr.)
- N.I.J. Level III+ (7.62 x 39mm MSC 123 gr, 5.56mm M855 62 gr)
- N.I.J. Level IV (CAL. .30 AP M2 166 gr.)
- CAL. .50 Ball M2 (Mild Steel Core)
- CAL. .50 AP M2 708 gr. (Armor Piercing)

Standard Dimensions

- 90"W. x 32"D. x 75"H.
